17 March, 2006.

TO WHOM IT MAY CONCERN.

Chiropractic Medicine is in extensive use Internationally. It is a non invasive treatment for bone, muscle, nerve, joint and tissue.. The Indian Association of Chiropractic Doctors is introducing this practice in India for the first time with the opening of a Clinic in Gurgaon. As I was suffering from an acute knee disorder, I had the opportunity of receiving treatment from the Doctors of the Chiropractic Health Group. This gave me considerable relief and I have since been cured without any surgery. I have no doubt that as soon as the availability of such treatment becomes known in India, there will be many who will take advantage of it.
